PROFILE

Information Systems graduate working across technology, content, and operations. Experience spans web and data tools, content and social media, and leading teams and events. Learns new tools quickly, mostly through self-directed courses in machine learning, SEO, and business process management.

EDUCATION

Universitas Sriwijaya — Palembang, Indonesia
Bachelor of Information Systems — Graduated Apr 2025

- GPA: 3.97 / 4.00. Relevant coursework: system design, digital forensics, machine learning, data analytics.
- Built web applications and automated data-processing tools in coursework and side projects.

PROFESSIONAL EXPERIENCE

Rhetoric Academy — Palembang, Indonesia
Social Media Specialist (Part-Time) — Jul - Aug 2024

- Planned and ran the Instagram and TikTok content calendar, using performance data to raise engagement 20%, grow followers 15%, and lift interaction rate 25%.

MVSLIM — United Kingdom (Remote)
Content Producer Intern — Feb - Mar 2024

- Ran a Ramadan digital marketing campaign about doing good deeds with a remote team, from setting goals and building the timeline to reviewing performance data.

PT PLN Indonesia Power — Indonesia
Kerja Praktik (Practical Work), Operations & Maintenance (OP-HAR) — Dec 2023 - Jan 2024

- Analyzed business processes in the OP-HAR division to find workflow problems and inefficiencies.
- Used questionnaires, interviews, and observations to study the workflows, and applied use cases, user stories, UML diagrams, flowcharts, gap analysis, and prototyping to support recommendations for improvement.

Niagahoster x Rakamin Academy — Indonesia (Remote)
SEO Outreach Intern — Aug - Sep 2023

- Audited webpages for on-page and off-page SEO.

LEADERSHIP & ACTIVITIES

Palembang Digital — Palembang, Indonesia
Product Development Contributor — Mar 2024 - Oct 2025

- Worked across teams on digital outreach programs and used participation data to decide what to prioritize.
- Supported community programs on digital literacy and local tech ecosystem growth.

MediaSI — Palembang, Indonesia
Staff Humas (Public Relations) — Mar 2023 - Apr 2025

- Ran the organization's official Instagram account for two years, writing copy and keeping the brand voice consistent.
- Handled communication with internal teams and outside audiences.

Google Developer Student Clubs (GDSC), Universitas Sriwijaya — Palembang, Indonesia
Core Team, Content Writing Division — Sep 2023 - Sep 2024

- Led a 9-person content team and set the year's content and outreach strategy.
- Ran events and regular communication to keep members and audiences engaged.

Member, Content Writing Division — Nov 2022 - Sep 2023

- Wrote articles for the GDSC UNSRI Medium publication and produced Instagram content; promoted to the Core Team the following term.

Pesta Rakyat Sriwijaya 2023 — Palembang, Indonesia
Staff, Social Media Specialist — Aug 2023 - Jan 2024

- Coordinated event content across platforms; engagement grew 30% for an audience of 2,000+ attendees.

Technology Euphoria Festival 2023 — Palembang, Indonesia
PIC of Publication — May - Oct 2023

- Led the publication team behind event content on Instagram, TikTok, and Twitter; engagement grew 80% for an event with 2,000+ attendees.

BEM KM Fasilkom, Universitas Sriwijaya — Palembang, Indonesia
Staff, Publication Management Division — Mar 2022 - Jan 2023

- Handled social media from copywriting to publishing and supported event planning.

PROJECTS

KITO Portal Publik Sep 2026

Team project

- Built the public portal for KITO, a Telegram complaint system for Palembang: residents see reports on a map, check status with a tracking code, and compare how fast each agency responds.
- Used Next.js, TypeScript, Tailwind, SWR, Leaflet, and Recharts. The Telegram bot, AI agent, and officer dashboard were built by other team members.
- Wrote the LinkedIn article describing the system (30 Sep 2026).

Azzifa Sep 2026

Personal project, azzifa.up.railway.app

- Built an AI-assisted mood journal with daily entries, a mood dashboard, weekly pattern insights, shared streaks, and photo notes.
- Developed the Express API, SQLite database, and vanilla JavaScript frontend. The AI layer works with Anthropic, OpenAI, or any compatible model by changing one setting. Deployed with Docker and covered by integration tests.

IBM Generative AI & Machine Learning, Hacktiv8 (MSIB Batch 7) Sep - Dec 2024

- Capstone (team of five): built a Bidirectional LSTM that classifies IMDB review sentiment, reaching 88% accuracy, recall, and F1. Performed data cleaning and feature engineering and contributed across the rest of the project.
- Built a generative AI web app on IBM watsonx.ai with Python and Streamlit, covering model selection, prompt design, and output evaluation.

Redesign Challenge, GDSC 2024

2nd place

- Wrote the backend in Go, organized in controller, service, and repository layers, for the team's entry.

Data and Research Coursework

- Built a Tableau dashboard of social aid distribution with Tableau and Excel.
- Clustered 27 years of Sumatra rice production data (1993-2020) with K-Means into three productivity clusters.
- Compared TOPSIS and SMART for choosing rice-growing regions; SMART was more sensitive and stable.
- Audited a hospital's DSS06 process with COBIT 2019: Level 2 capability, 92.8% fully achieved, with a roadmap to Level 3.
- Designed a Figma dashboard for predictive maintenance at PT PLN Indonesia.
